

## **The Buffalo Transportation Pierce-Arrow Museum Narrated Tour with Jim Sandoro**

Jim, the owner, will be opening up the museum, especially for us. He will give us a guided tour of his collection along with some behind-the-scenes information. The main building of the museum used to be the showroom and repair shop for the Mack Truck. At the museum, you will see more than just Pierce-Arrows. The vast collection includes many automobiles that were produced in Buffalo. The Corvair engines were made here. On display are many racing engines, various other cars, and a large bicycle display, among many other displays.
